ERP Implements Important Enhancements

Working with pilot agency feedback, the ERP Team at DoIT continues to make progress and achieved another milestone in the past week, with the integration of over 650,000 ERP vendor taxpayer identification (TIN) numbers. The team worked with the Office of the Comptroller (IOC) to make this advancement possible. The feature will bring many benefits to authorized ERP users, such as leveraging the system's ability to provide field level security, preventing duplicate vendors and improving tax reporting capabilities for locally held funds. More information on the progress of ERP can be found on the [program site](#).

Read All About It!

Word is spreading about the State of Illinois' impressive progress with technology modernization. To see the latest news coverage on what DoIT is helping enable for the State, be sure to check out the [DoIT in the News](#) section of our website and follow us on Twitter [@IllinoisDoIT](#).

IEMA Launches New Version of WebEOC

The team at IEMA recently launched the latest mobile friendly version of the WebEOC (Emergency Operations Center) tool to support the mission of crisis management, public safety and emergency response personnel. The new application has redesigned mobile and web user experience and features a fresh interface for an improved and customizable use. DoIT helped enable the operations team at IEMA's vision and provided training opportunities to ensure user readiness prior to the go live on February 6. The new version will help meet IEMA's need for improving real-time information sharing and is available for download through the app stores (iTunes and Google Play for authorized users).

DoIT FYIs & Reminders

♥ **February is American Heart Month**

The Illinois Department of Public Health and its partner agencies and colleagues around the state are making significant progress in raising awareness about heart disease and strokes by helping people to understand their risk factors. Successful programs are in place to assist Illinois residents. [Click here](#) for information on prevention efforts.
