This Week:

- **Impressive Transformation Progress in Sprint 5**
- **April is Information Technology Month**
- **Child 360 Project Recognized Nationally**

Impressive Transformation Progress in Sprint 5

Today wraps up Sprint 5 for IT Transformation and efforts were focused on operational advances. Some of the key deliverables include: establishing an Enterprise Program Management Office (EPMO), launching an Advisory Board of Directors and creating the Enterprise Service & Rates Committee. Congratulations to all involved on these and other significant accomplishments as we move on to even more progress in the next sprint. For more information, visit the Transformation Wiki.

April is Information Technology Month

Governor Rauner declared April 2017 as Information Technology Month in Illinois to celebrate the important work being done by IT professionals statewide and to encourage students to understand the growing opportunities in IT and the workforce. To commemorate this month at DoIT, many activities, events and announcements are scheduled. Be sure to watch for updates over the next few weeks.

Child 360 Project Recognized Nationally

This week, DoIT was represented at the State Healthcare IT Connect Summit in Baltimore to present the Child 360 model and explain how it will deliver better service to Illinois children in need. Working in conjunction with the Health and Human Services agencies, the project creates a holistic view of a person to better provide services, care and improve outcomes.

DoIT FYIs & Reminders

Mark your calendars for the next DoIT Town Hall meeting on Wednesday, April 12th at 1:00 pm. The meeting can be accessed via a webcast by clicking here.

Don't forget to support DoIT nominees for the 2017 StateScoop Awards. Votes can be placed here and the deadline is April 12th.
